

Build A Quilt Vinyl Block Pouch

Store your Build A Quilt blocks in style with this Vinyl pouch made with fabrics that coordinate with your colorway!

Kit includes:

2 Coordinating Fat Quarters

1/3 yard of fabric

Vinyl

Double Stick fusible batting

This block pouch is adapted from a free tutorial on the Moda Bake Shop (<https://my.modafabrics.com/2018/03/vinyl-project-pouch.html>) with the alterations listed below:

Fabric Alterations:

2 coordinating fat quarters (included in kit)

7" WOF strip of another coordinating fabric (included in kit)

6" WOF Strip for binding (included in kit)

15" square of heavy vinyl (included in kit)

15" square of double stick fusible batting (included in kit)

You will need to purchase a zipper that is at least 15" long.

Construction Alterations:

-Two 15" X 15" squares of fabric are used instead of making a patchwork block from a mini charm pack.

-The two 15" X 15" squares are fused together using double stick fusible batting. However, if you do not want to quilt the squares, you may use double stick fusible web instead.

-The pouch will finish 14 ½" X 14 ½".

-If you want to add handles your will need to cut 2 – 3" X 16" strips of fabric leftover from a fat quarter and 2 strips of batting to fit in the strip. You can make the handle any size or length you desire anyway you like to do handles.

Video Tutorial

Joni put together a video tutorial showing you how to make the pouch, which you can see by clicking here: <https://youtu.be/GvDoJaWb82U>

Note: In the video, fusible web was used and there is no quilting. Also, no handles were shown in the video.
