Free-Motion Fillers
Free-motion Challenge Quilting Along

Welcome to the first week of the Fillers Free-motion Challenge Quilting Along. In this week's video tutorial, I'll show you how to quilt circle-shaped filler designs, starting with the classic pebbles design. You'll also learn how to build off of the pebbles design to create several different variations. By the time you're done, I hope you'll love these designs as much as I do!

Your Challenge

If you're quilting along with me on the custom challenge panel, fill in the sections highlighted in yellow with the circle fillers of your choice. You can use the design placement suggestions to the right or come up with your own placement ideas!
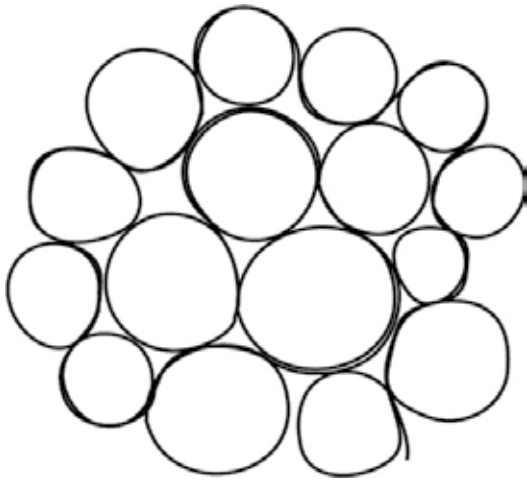

Design Placement Suggestions

# Pebbles
Circle Filler #1

Pebbles are a classic quilting design that can really "smash down" and fill in the area around elements in your quilt that you really want to show off.
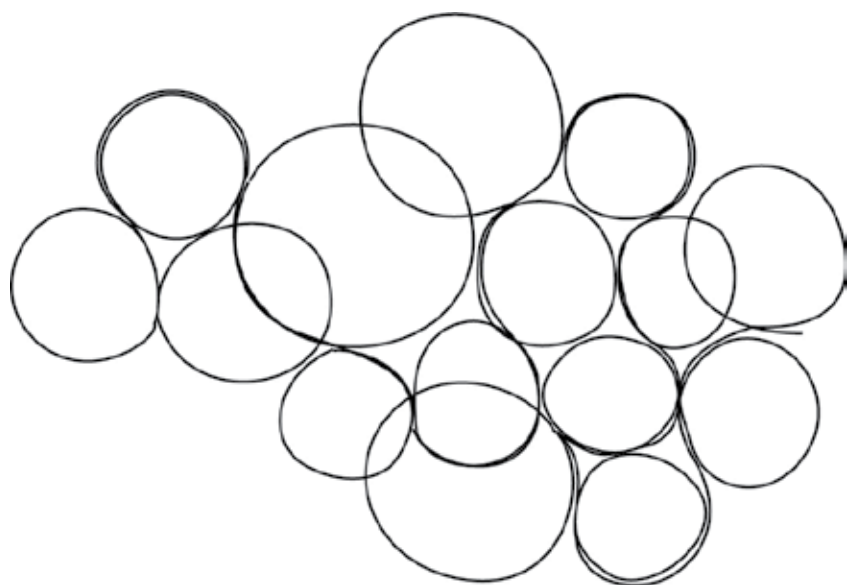

Bubbles
Circle Filler #2

Changing up the size of the circles is a great way to change up the look of classic pebbles, and as a bonus it's quicker to quilt!

# Overlapping Pebbles

Circle Filler #3

For an added touch of whimsy to your quilt, try overlapping your circles. This filler creates a completely different texture and can really draw attention to an area.
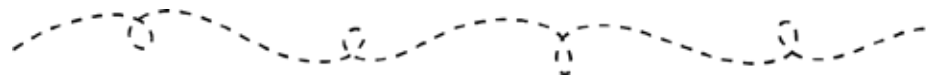

Echoed Pebbles

Circle Filler #4

Incorporate a little echoing to add emphasis to your quilting! Echoing the inside of your circles is not only fun, it looks great as well!
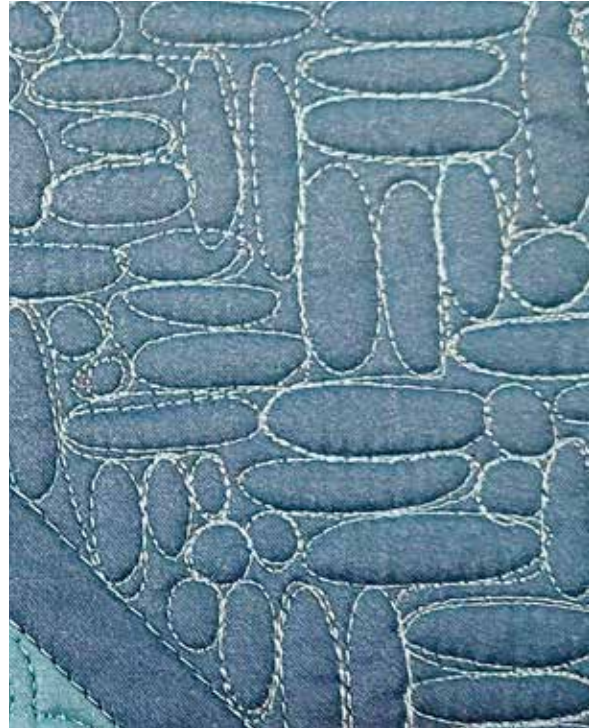

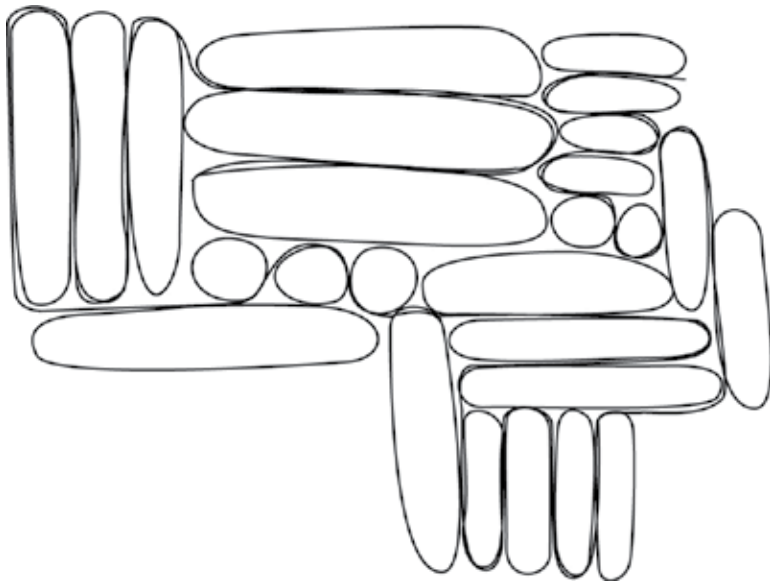

Ovals

Circle Filler #5

For this design, we are changing up the shape! Going from round to oval creates a completely different look.
