Quilting with Straight Edge Rulers

Suggested Supplies

You'll only need a few supplies to quilt along with me during the free video series!

Straight Edge Machine Quilting Ruler

I'll be demonstrating how to quilt the techniques and designs with the Slim straight edge ruler (available on our website), but any straight edge ruler will work.

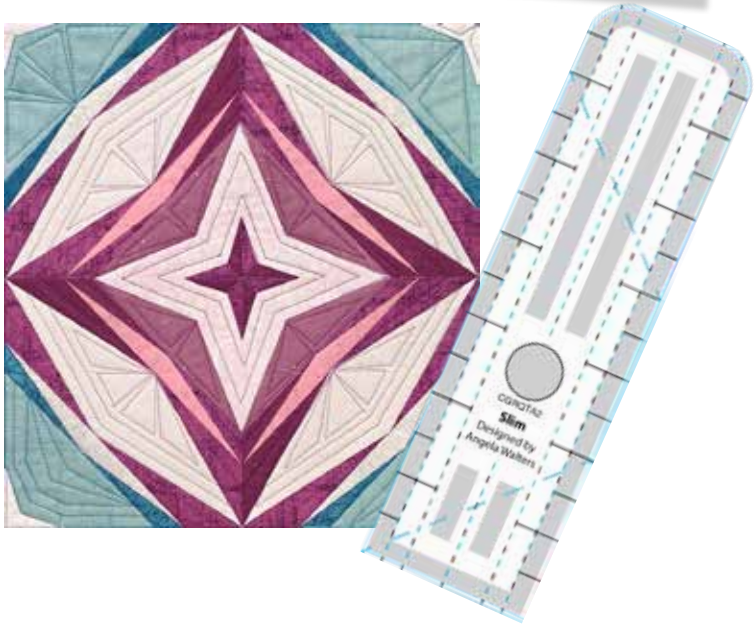

Ruler Quilting Foot

Quilt Sandwich

You can quilt along with me on the custom challenge panel *(available in two sizes)*, use an unfinished quilt top, or even some fat quarters. If quilting on a sewing machine, you can baste your quilt sandwich with any method that you prefer.

Machine Quilting Thread

High quality thread can help prevent tension issues and thread breaks. I will be demonstrating the designs using, Glide, a 40 weight thread. 50wt cotton also works great for machine quilting.

Needles

I prefer Superior Topstitch needles *(if quilting along on a sewing machine)* since they are strong enough to handle the stress of machine quilting. The size you use depends on the size of thread you're quilting with.

Removeable Marking Pen

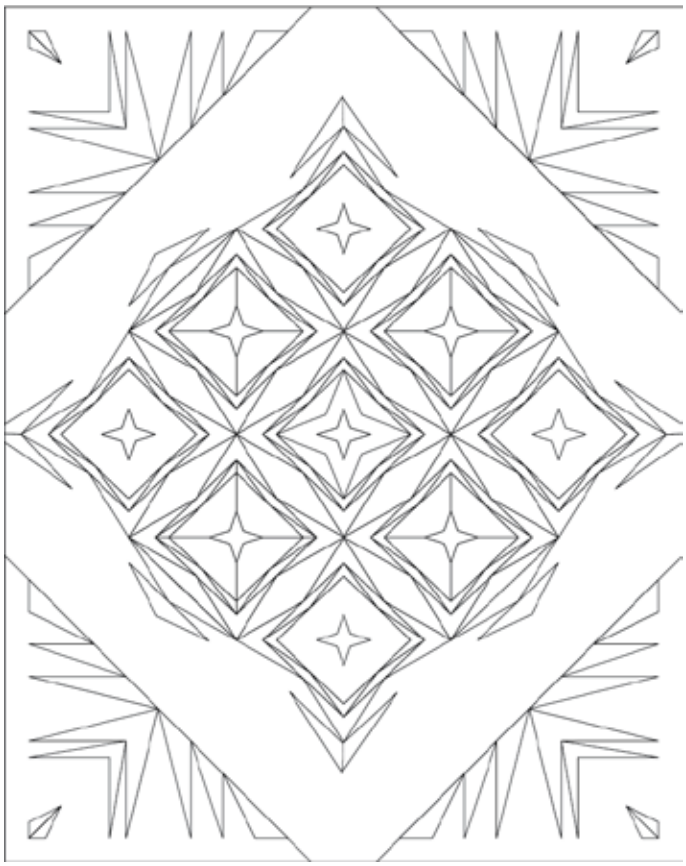

I prefer the Mark B Gone water soluble marker, but any type will work fine. We will be using this to mark reference lines for our designs.

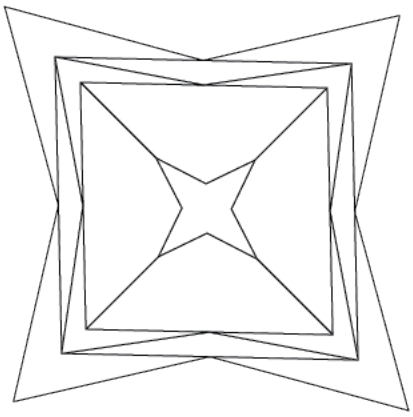

Other Machine Quilting Notions (Optional)

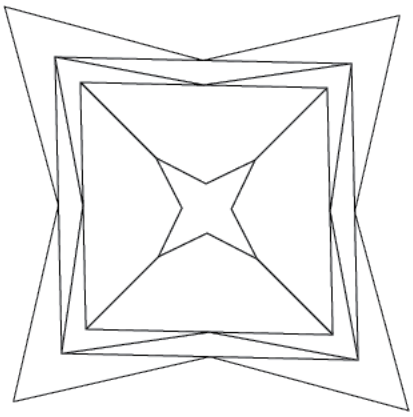

If quilting along on a sewing machine, a Supreme Slider, an extension table and machine quilting gloves may be helpful.

Audition Designs

Use the diagram below to audition different quilting designs on the panel.

Coordinating Thread Colors
